

therapeutic agent (i.e., paclitaxel) or uses of same. Method of manufacturing and therapeutic method claims, e.g., claims 21, 23-28, 35, 37-43 read on methods of making pharmaceutical compositions comprising paclitaxel or treatment methods comprising administration of paclitaxel to a patient.

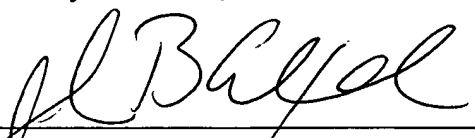

Election B: The method of claim 21 was the elected as the manufacturing method for making the elected compositions. Claims 21 and 23-28 read on the elected method of manufacturing the pharmaceutical composition of any one of claims 1-20. Thus, claims 21 and 23-28 also relate to methods of making pharmaceutical compositions of paclitaxel.

Election C: The method of claim 37 was the elected as the therapeutic method for administration of the elected compositions. Claims 35 and 37-42 read on the elected therapeutic method.

Early consideration and allowance of the application are earnestly solicited.

Respectfully submitted,

August 15, 2003
